SAGO LOCO · BRK CONCEPT FRONTIERS OPC

POS Guide for Franchisees

How to sign in, read and download your store's sales, and manage your crew.

For: Sago Loco franchisees
Version 1.0 · November 14, 2026
Web address: **pos.sagoloco.com/hq**

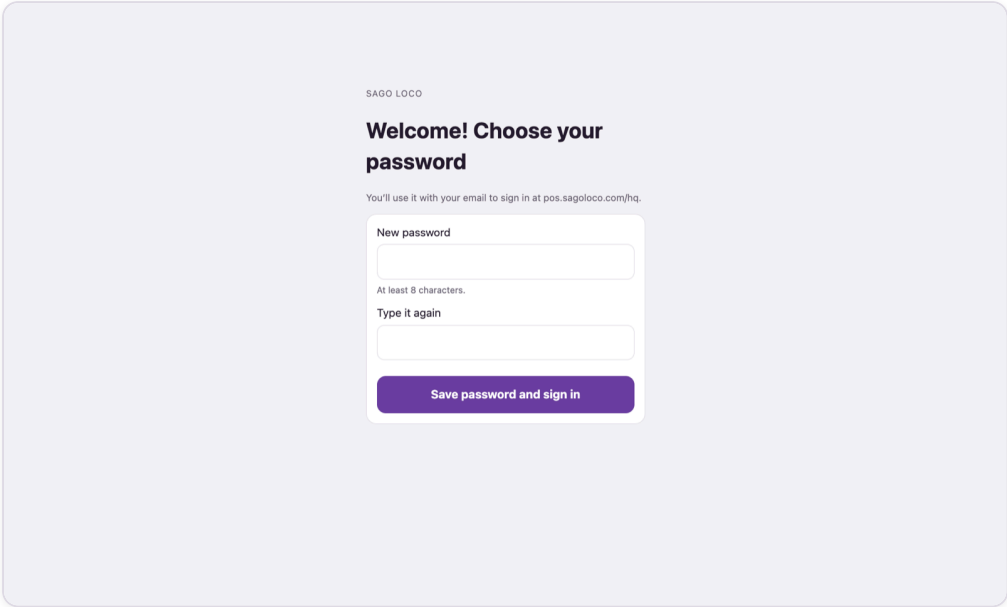

Contents

1. Your login
2. Reading your sales
3. Every transaction, and custom dates
4. Downloading sales to Excel
5. Your crew
6. The store tablet
7. What HQ handles, and good to know

Screens in this guide use sample stores, names and numbers. Your screens show your real data.

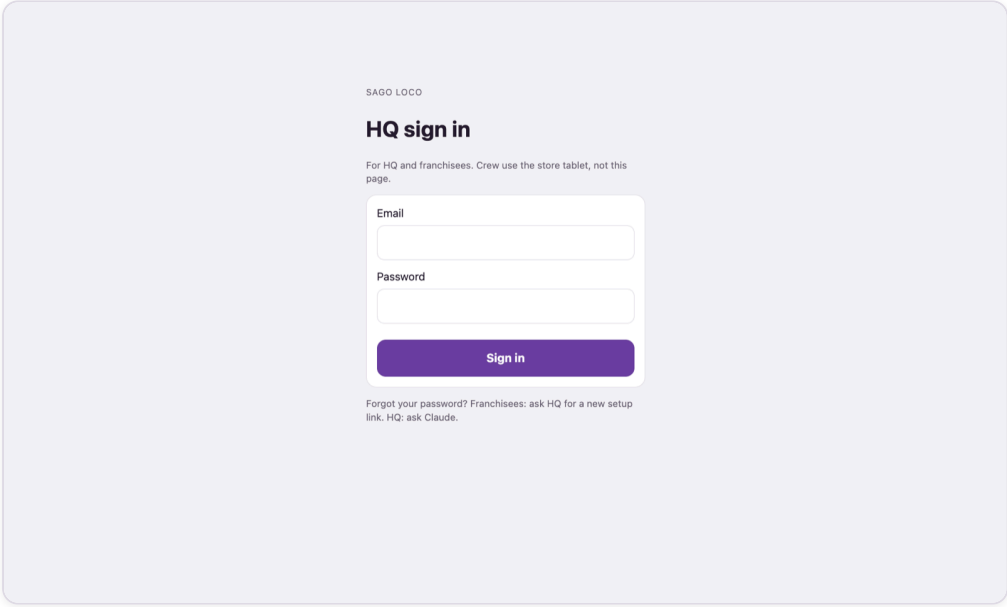

1 Your login

HQ sends you a message with a **setup link**. Open it on your laptop or phone, choose your password (at least 8 characters), type it again and press **Save password and sign in**.

Choose your own password. HQ never sees it.

After that, sign in any time at **pos.sagoloco.com/hq** with your email and password.

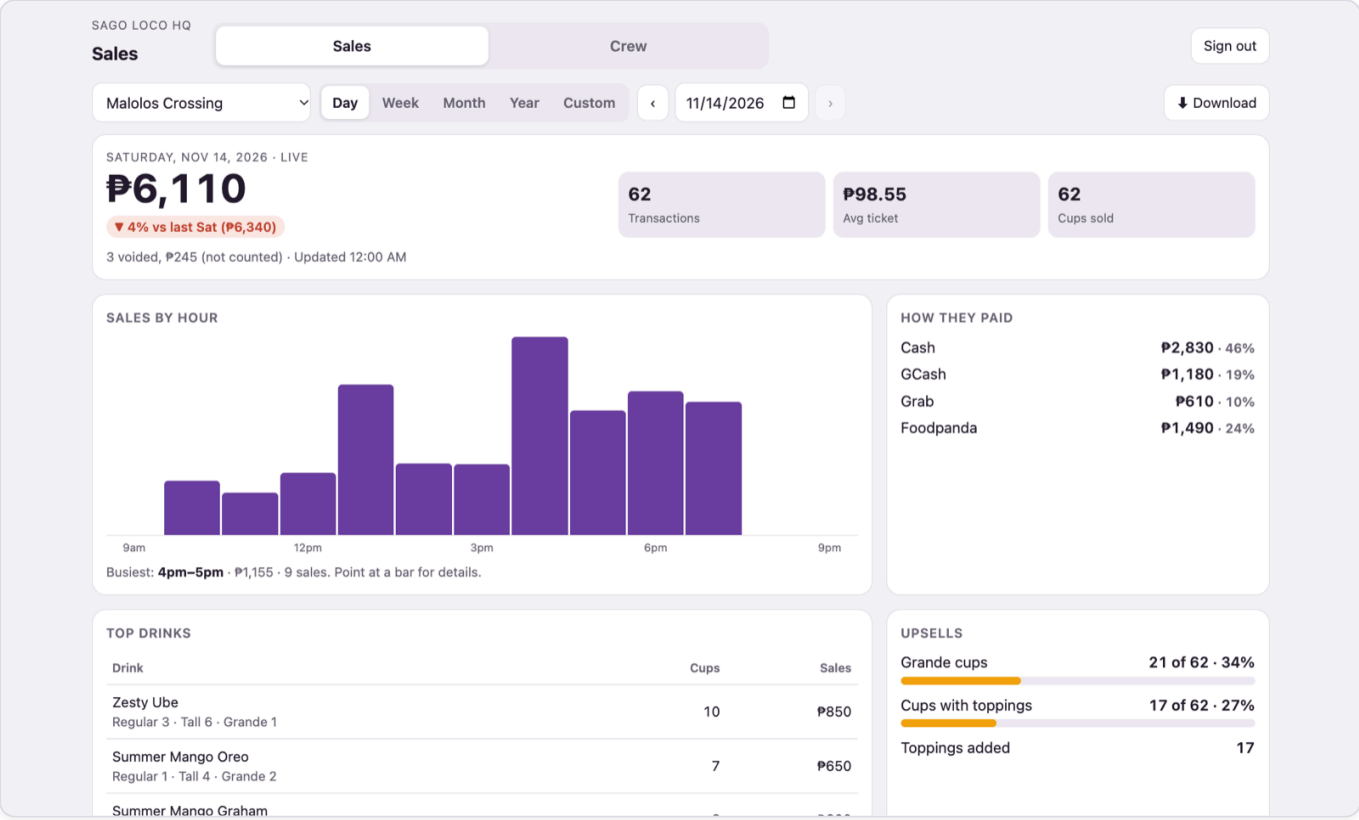

Sign in

> The link works once and expires after 24 hours. Forgot your password, or the link expired? Message HQ for a new setup link.

2 Reading your sales

The **Sales** tab opens on today. It refreshes itself every minute while you are looking at a period that includes today.

1. **Store:** Your store is already picked. If you have more than one store, choose one or **All stores**.
2. **Period:** **Day** **Week** **Month** **Year** or **Custom**.
3. **Arrows** ‹ › step to the previous or next day, week, month or year. The button beside them jumps back to today.

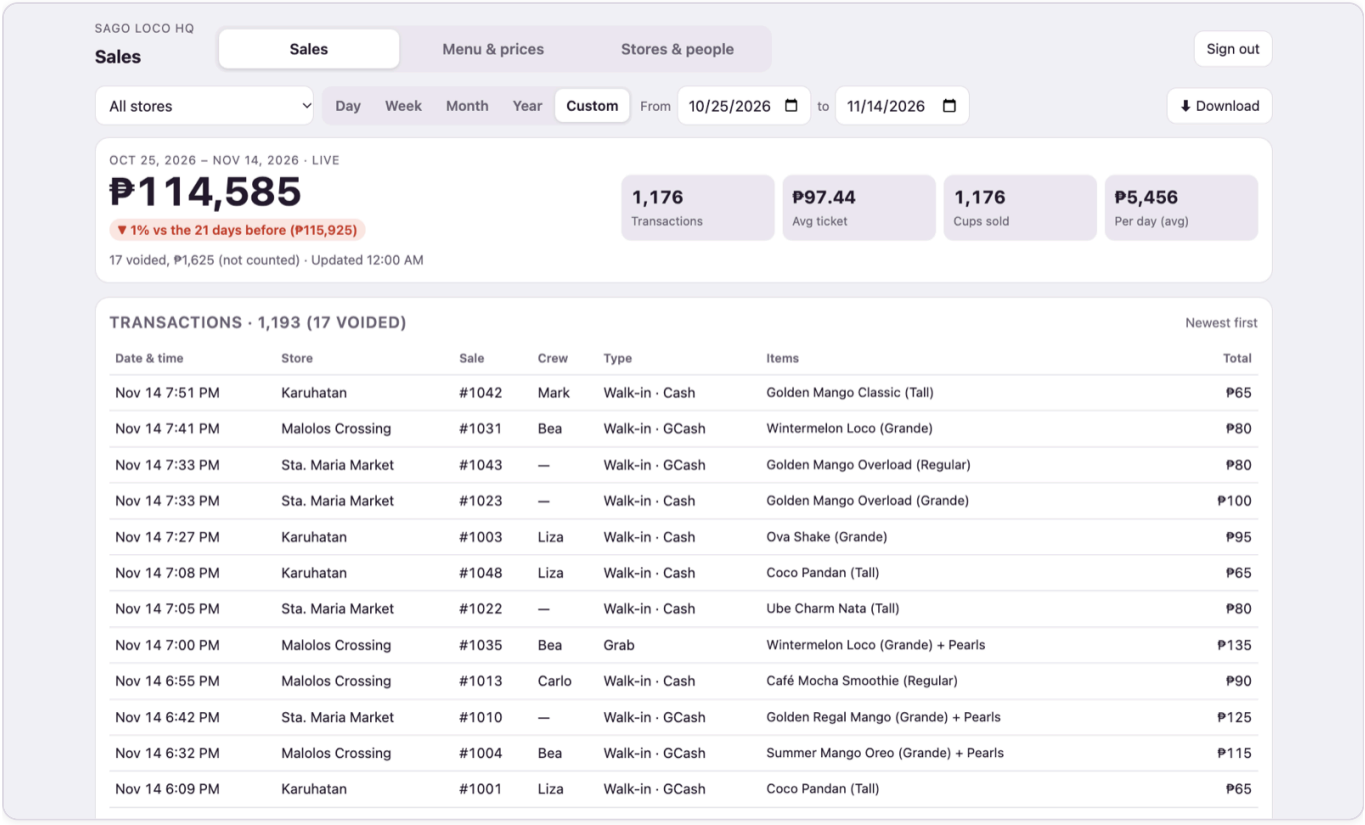

Sales for a month. Weeks run Monday to Sunday.

On screen	What it means
Big number	Net sales: what customers paid after discounts. Voided sales are **not** counted.
Green or red badge	Change against the period before. A period still running is compared with the same number of days, so the comparison is fair (e.g. “the first 13 days of October”).
Transactions · Avg ticket · Cups sold	Counted sales only. Avg ticket = net sales ÷ transactions.
Voided (not counted)	How many sales were voided and their total. Nobody can delete a sale; a void is only marked.
Charts	By day (or by month for long periods) and busiest hours. Point at a bar (on a phone, tap it) to see its numbers.
How they paid · Upsells · Top drinks	Cash, GCash, Grab, Foodpanda; share of Grande cups and cups with toppings; best-selling drinks.

3 Every transaction, and custom dates

Scroll down to **Transactions** to see every sale in the period, newest first: time, sale number, crew, type, items and total. Voided sales stay on the list, marked **Voided** with the reason.

For any dates you like, press **Custom** and pick **From** and **to**.

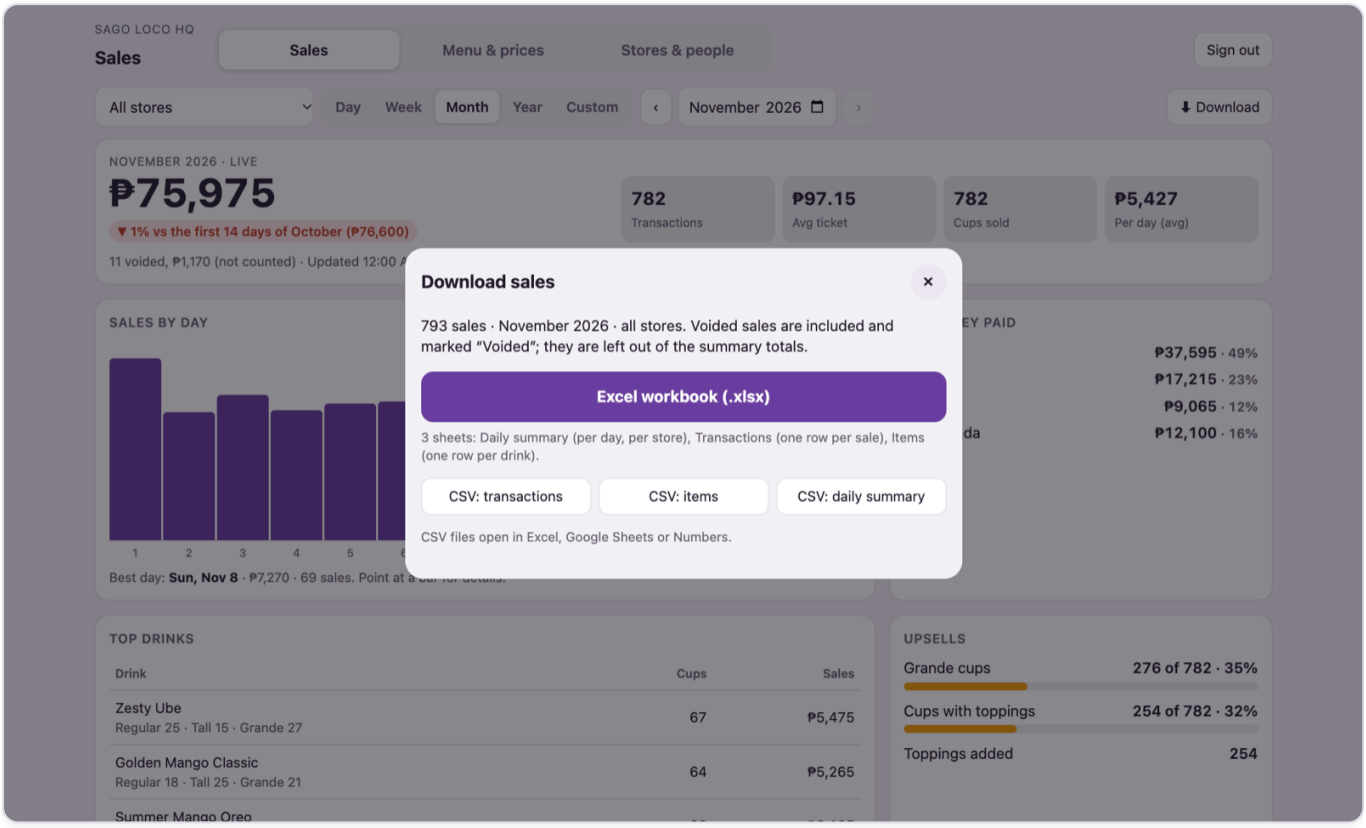

Custom dates with the list of transactions

> Long lists show 50 at a time. Press **Show more** at the bottom, or download the whole list (next section).

4 Downloading sales to Excel

Press **⬇ Download** at the top right. It downloads exactly what is on screen: the same store and the same period.

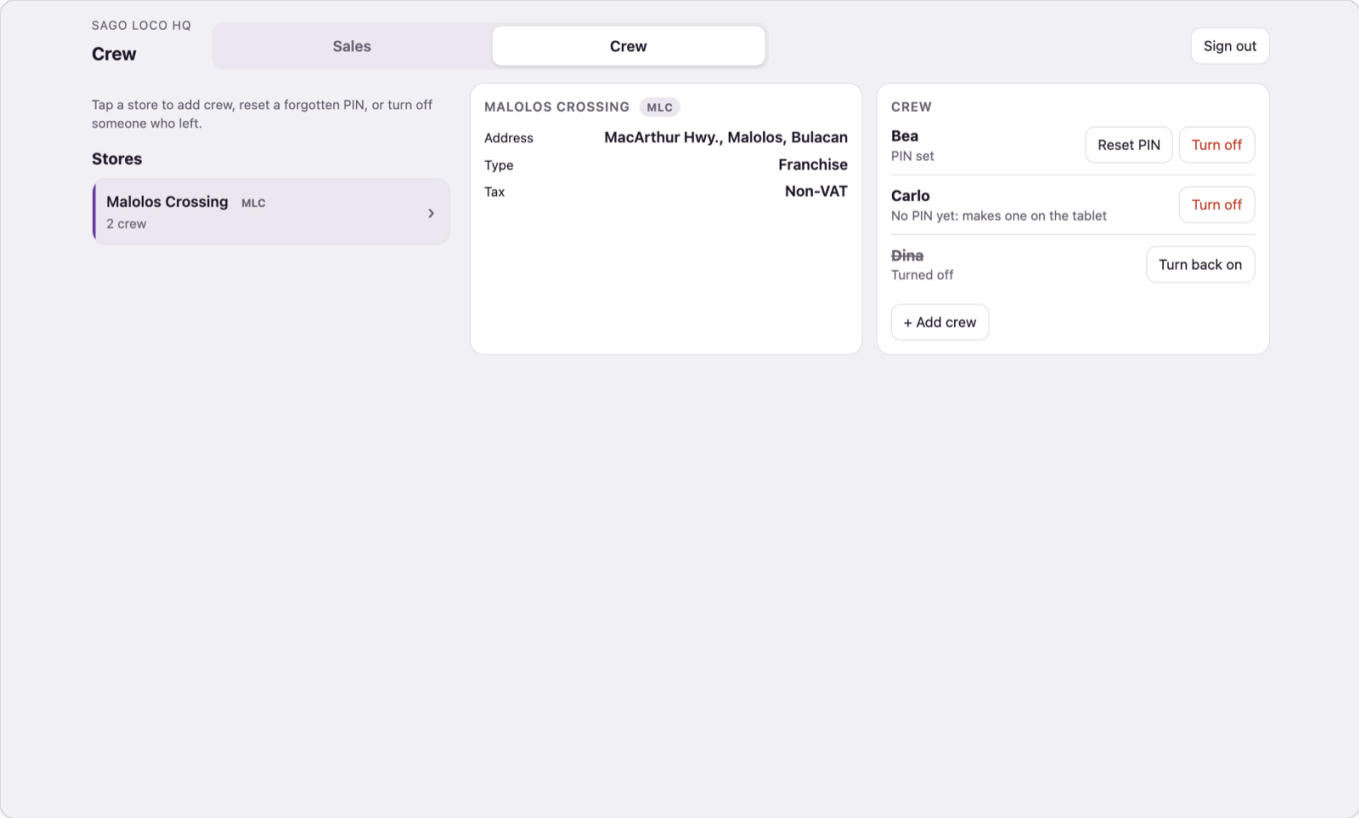

Choose Excel or a CSV file

Choice	What you get
Excel workbook (.xlsx)	One file with 3 sheets: **Daily summary:** one row per day per store (transactions, cups, net sales, cash, GCash, Grab, Foodpanda, voids). **Transactions:** one row per sale (date, time, store, sale #, crew, type, items, totals, cash given, change, status). **Items:** one row per drink sold (drink, size, toppings, promo, discount, net).
CSV files	The same three lists as separate files. They open in Excel, Google Sheets or Numbers.

> Voided sales are in the Transactions and Items sheets, marked "Voided", so nothing is hidden. They are left out of the Daily summary totals.

5 Your crew

Open the **Crew** tab. You see only your own stores.

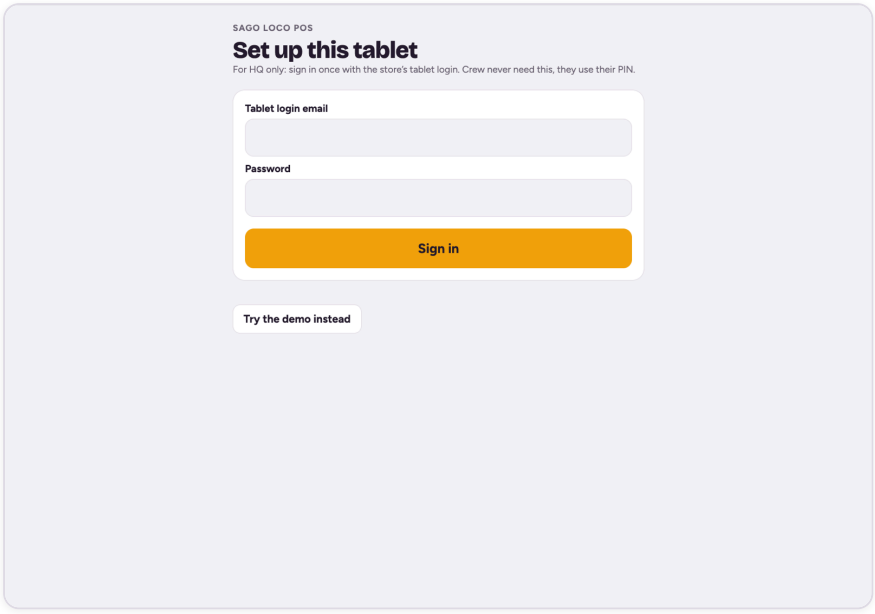

Your store and its crew

I want to…	Do this
Add a new crew member	**+ Add crew**, type their name as it should show on the tablet. They make their own 4-digit PIN the first time they tap their name on the tablet.
Help someone who forgot their PIN	**Reset PIN** beside their name. Next time they tap their name (with internet), they make a new one.
Remove someone who left	**Turn off**. They disappear from the tablet within 5 minutes. Their past sales and time records stay.

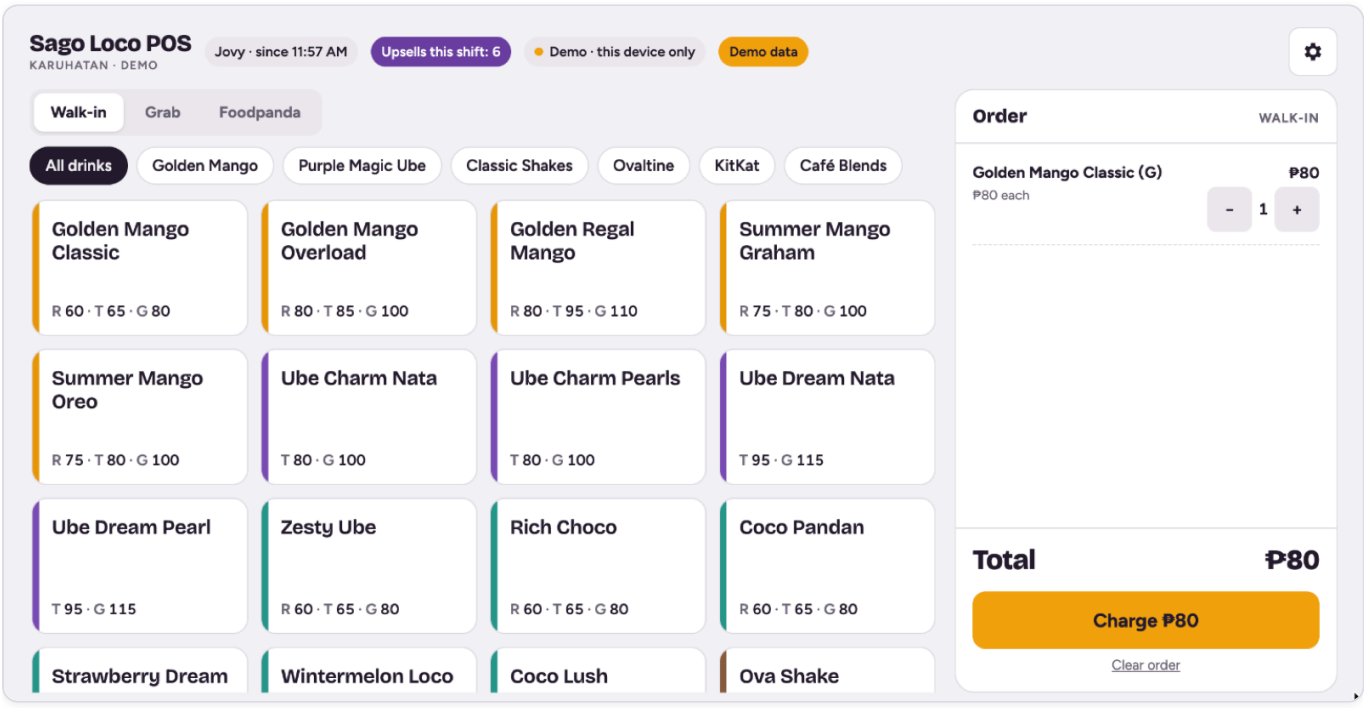

6 The store tablet

Your counter tablet runs the Sago Loco POS at **pos.sagoloco.com**. HQ sets it up once with your store's tablet login.

First-time setup (done by HQ)

After that, crew tap their name and type their PIN. They open the shift with the starting cash, take orders in two taps (drink, then size), choose Walk-in, Grab or Foodpanda, and close the shift with a cash count at the end of the day. Time in and time out use a selfie.

The register

> If the internet drops, the tablet keeps selling and saves everything. It sends it all when the internet is back. Always open the POS from the Home Screen icon, not from Safari.

7 What HQ handles, and good to know

Ask HQ to…	Why
Change a drink, price, topping or promo	The menu is the same for every store; only HQ changes it.
Send a new setup link	Forgotten password or expired link.
Make a new tablet password	New tablet, reset tablet, or a lost tablet.
Change your store's details	Name, address, VAT.

Good to know

- You only ever see your own stores.
- Nobody can delete a sale, not even HQ. Mistakes are **voided** with a reason. Voided sales are listed but not counted in your totals.
- Selfie photos from time in and out are deleted automatically after 90 days.
